The program consists of

1. Two short courses. Each course will have 8 one hour long lectures and some open discussion at the session/day.
2. Invited talks by local researchers. The speakers are not yet finalized
3. Students' poster session

**Course 1**: Ashish Goel (Stanford), Topic: Topics in Social Algorithms
**Course 2**: Rudiger Urbanke (EPFL), Topic: How Physics and Computer Science Helped us Build Better Codes
