Machines Lab RA Selection Process

Requirements: Candidates should be well versed in electric machines, power electronics, power systems and electric drives.

Selection Process:

- **Step I** – Preliminary shortlist of approximately 50 candidates based on their EE GATE scores.

  Students shortlisted based on Step I will proceed to Step II.

- **Step II** - Interview: Questions will test candidate’s basic knowledge of Electrical machines, Power electronics, Power systems, equipment/instruments in Electrical Engineering laboratories, and previously completed projects by the candidates. There may also be questions about additional hardware, software skills and past industry experience (if any).
