

`const.gce`

Attributes

```
mainvars: y  
rparms: c=0 c1=0 c2=0
```

Description

`const.gce` produces a variable (y) which has a constant value given by the real parameter c . In AC analysis, y is assigned a constant complex value $\mathbf{y} = c_1 + \mathbf{i} c_2$ where c_1 and c_2 are equal to the real parameters `c1` and `c2`.
