

clock1.dce

Attributes

```
mainnodes: a
iparms: i0=0
rparms:
+   t10=1   t20=1
+   t1new=1 t2new=1
+   t_change=10
```

Description

clock1.dce provides a clock waveform. Each period is divided into two intervals, **t1** and **t2**. If the interger parameter **i0** is 0 (1), the initial value (during interval **t1**) is 0 (1).

The element has a provision to change the **t1** and **t2** values. Up to **t_change**, they are specified by **t10** and **t20**, respectively, and after that, they are specified by, **t1new** and **t2new**, respectively.
